Torrance to Share In Beverage License Fees

Allocation of alcoholic beverage license fees, amounting to \$1,582,856, which sum is one-half of the amount collected for the period Jan. 1 to June 30, 1943 was announced today by William G. Bonelli, Los Angeles member of the Board of Equalization for the Fourth District. Bonelli explained that this sum under the law is returned to the cities and counties from which it was collected and that under the legal opinion of the state attorney general, it is not only available but intended for use in those cities and counties for enforcing the provisions of the state liquor laws by local authorities.

Of these funds \$418,954.39 will be distributed in Los Angeles county, where \$72.50 will go to Torrance and \$11,240.10 to the unincorporated area in the county.

AUDITOR REEMPLOYED

The Torrance city council has authorized renewal for another year the contract with Logan R. Cotton to serve as city auditor at the same compensation paid during the past year.

The NEW Winning of the West

Santa Fe

JUST 75 years ago this week, October 30, 1868, rail was laid on the first unit of the Santa Fe System Lines—a 17-mile stretch in Kansas from Topeka to Carbondale.

Today, Santa Fe System Lines are over 13,000 miles long, serving people and products from Illinois to California, and from Colorado to the Gulf of Mexico.

Looking Ahead

Farsighted men, even years back, began looking ahead to the Southwest and West not only as a land of enchantment and natural resources but as the coming theater of industrial expansion in this country.

The war has brought home the soundness of this vision—big things are happening today in the states of Santa Fe land.

States served by the Santa Fe

In California, steel mills, shipyards, power dams, plane plants and lumber mills are working around the clock to supply more, more, and more of the sinews of war.

Arizona is winning new fame in the fields of agriculture, live-stock, mining, and as an aviation center.

Freight cars are rolling out of New Mexico loaded with essential copper, potash and zinc, as well as steers and sheep.

Kansas is becoming famous for its plane factories and munition plants, as well as its golden wheat fields.

Oklahoma's oil is writing bright new pages in the science of war, and advances for the peace to come.

Illinois, Missouri and Iowa are saying it around the world with factory and food products.

The lead and silver and coal from Colorado's mineral-filled mountains are doing great things toward winning a war.

Thousands are flocking to Texas—great state of farm, factory and free enterprise—to man its booming plants, cultivate its soil, and ride its far-reaching ranges.

Santa Fe all the way for U. S. A.!

We of the Santa Fe are too busy "keeping 'em rolling" for Victory to take time off to celebrate the 75th anniversary of the laying of our first rail.

This is, however, an appropriate time to point out how important to the development of this New West has been the linking together of its States by Santa Fe rails. We are naturally proud to be part of this great development.
